SDG 15: Indicator 15.3.3

1. DORSU Baganga Student Artists in Action

Student artists from Davao Oriental State University - Baganga Campus proudly showcased their creativity and passion for the environment as they joined the Mural Painting Information Education Campaign and Coastal Clean-up Drive in our beloved municipality of Baganga!

This meaningful activity is part of the M2P2 (Macro and Micro Plastic Pollution) research program, which aims to raise awareness on marine conservation and sustainable coastal living.

Through vibrant murals and hands-on community work, our student volunteers are helping spread the message of environmental stewardship and love for our seas.

Kudos to our talented student artists, our hardworking volunteers, and our community partners for making this event a success!

2. **DOST XI Director Sales Lauds DOrSU's Start of University Research Complex**

Dr. Anthony C. Sales, CESO III, Regional Director of the Department of Science and Technology (DOST) Region XI, lauded Davao Oriental State University (DOrSU) for the establishment of its University Research Complex (UResCom) during his visit to the facility in Marfori, City of Mati, on August 22, 2025.

The ₱29-million research hub, formally inaugurated on 8 February 2023, houses state-of-the-art laboratories and institutes designed to strengthen the university's research, innovation, and extension programs.

"I am happy that DOrSU has started this University Research Complex," Dr. Sales said.

The UResCom includes five specialized laboratories—Bioassay and Testing, Microbiology, Tropical Genomics, Vertebrate Research, and Invertebrate Research—as well as six institutes focusing on distinct areas of study: the Institute for Soil and Water, Institute for Bioassay Development and Screening, Institute for Terrestrial Regenerative Biodiversity, Institute for Food Innovation, Institute for Materials Innovation Design and Fabrication, and Institute for Natural Products Discovery and Development.

Looking ahead, UResCom will build stronger partnerships with government, private groups, and international organizations, positioning DOrSU as a key contributor to sustainable farming, biodiversity protection, and food security in Mindanao. (DOrSU PIO)
