SDG 15: Indicator 15.3.5

1. **The launching and unveiling of species in Mt. Kampalili**

On September 30, 2025, we successfully celebrated SCIMONTH 2025: The Launching and Unveiling of Species in Mt. Kampalili. The event featured a series of meaningful activities including educational lecture, interactive booths, and engaging exhibitions that highlighted the value of biodiversity and environmental awareness.

In line with the celebration, the Bachelor of Science in Environmental Science program, led by Dr. John Glen P. Seniel, also conducted a Tree Planting Activity on September 26, 2025, highlighting the importance of conservation and sustainability.

This celebration serves as a reminder of our collective responsibility to safeguard biodiversity and nurture our natural environment for future generations.
